• PROFILE

As a software engineer with **over four years of experience**, I am proactive, always open to new challenges, and eager to learn. I have a passion for problem-solving and continuously strive for improvements in my work. With solid technical skills and a solution-oriented mindset, I am ready to tackle any challenge that comes my way.

• EMPLOYMENT HISTORY

Software Engineer at iTalents

March 2023

- **Training and Mentorship:**
 - Actively oversee the training and development of interns and junior staff, employing innovative techniques such as pair programming and task sketch improvements.
- **Software Refactoring and Scalability Enhancement:**
 - Took on a pivotal role in refactoring the company's flagship software, enhancing scalability and facilitating the integration of new functionalities.
 - Undertook comprehensive redesigns of the database, backend, and frontend components, alongside implementing optimization strategies to boost performance.
- **Software Development from Scratch:**
 - Designed and implemented architectures on **AWS**, including EC2 instances, S3 buckets, and Redis for efficient data storage and retrieval. Leveraged AWS services to optimize system performance, reliability, and scalability, contributing to the seamless operation of our applications.
- **E-commerce Integration and Automation:**
 - Led the successful implementation of an e-commerce platform and integration with our system to bolster student enrollment numbers.
 - Leveraged Shopify and Laravel to streamline the enrollment process, resulting in increased marketing opportunities and sales conversions.

Leveraging a robust skill set, including expertise in **NextJS, NestJS, TypeScript, SQL, and Docker**,

Software Engineer at Codeby

April 2022 — January 2023

- Technologies **Vtex (IO, CMS, and Faststore), Shopify, Next.js, and React.js**, to deliver superior solutions tailored to meet client needs.
- **Store Enhancements and Standardization:**
 - Led initiatives to improve store functionalities and streamline processes, resulting in enhanced user experiences and increased efficiency.
 - Implemented standardized design elements and styles across multiple platforms, ensuring consistency and brand coherence.
- **Client Consultation and Support:**
 - Established rapport with clients through effective communication and proactive problem-solving, fostering long-term relationships and repeat business.

Software Engineer at Arcadis

August 2021 — April 2022

- **Process Improvement and Decision-Making Enhancement:**
 - Collaborated with project leaders to revamp processes and decision-making frameworks, implementing a streamlined **Git workflow** and standardizing project architectures. Resulted in a significant boost in productivity and quality within the technology team.
- **Optimization and Enhancement of Software Solutions:**
 - Implemented performance optimizations and enhancements across a variety of projects, utilizing **JavaScript, Typescript, PHP (including Vanilla JS, React, and Laravel) and Azure**. These optimizations resulted in tangible improvements in project performance, enhancing user experiences and driving operational efficiency.
- **Problem-Solving for Environmental Sector Challenges:**
 - Developed web applications tailored to their specific needs, effectively tackling environmental issues with innovative technological solutions.

Software Engineer at Freelancer

December 2020 — August 2021

- **Project Diversification and Scalability:**
 - Orchestrated a multitude of projects across various scales and complexities, showcasing versatility and adaptability in handling diverse client needs.
 - Leveraged a comprehensive skill set spanning **React, React Native, PHP, MongoDB, SQL, and Vanilla JavaScript** to deliver tailor-made solutions tailored to each project's unique requirements.
- **Innovative Solutions from Conception to Completion:**
 - Conceptualized and developed bespoke solutions from the ground up, demonstrating a deep understanding of client objectives and translating them into tangible deliverables.

Software Engineer at Unyleya

January 2020 — December 2020

- In my role as a Software Engineer, I approached challenges with a proactive mindset, utilizing **PHP, JavaScript, SQL Server, Laravel, Angular, Marionette Backbone, Bootstrap, and React Native**.
- **Innovative Problem-Solving and Troubleshooting:**
 - Employed innovative problem-solving techniques to address complex challenges inherent in modernizing legacy systems, effectively mitigating risks and minimizing disruptions.
 - Collaborated closely with cross-functional teams to define project scopes, prioritize tasks, and allocate resources effectively, fostering a culture of collaboration and shared accountability.

EDUCATION

Software Analysis and development, UniCEUB

2020 — 2023

Bachelor of Technology - BTech

Full Stack Developer, IBM - Coursera

2023

Professional Certificate
